

# Flushable: Think Twice

**M**any personal cleaning products and household cleaning products marketed as “flushable” or “disposable” should not be flushed down the toilet. Why? These products do not degrade like toilet paper, and they wind up clogging pipes, tangling pumps and causing messy sewer backups into streets, businesses and homes.

**N**o matter what the label says, the only things you should flush down the toilet are the three **P's**: **P**ee, **P**oo and toilet **P**aper!

## DISPOSE OF THESE ITEMS IN THE TRASH, NOT THE TOILET!
