

**CLARK COUNTY WATER RECLAMATION DISTRICT  
STATEMENT OF QUALIFICATIONS 2025 USER GUIDE**

**SERVICES: Scheduling and Claims Analysis**

Firm to demonstrate experience performing construction scheduling analysis, development of project schedules, claims analysis, identification of potential claims issues, research case history to support or deny claims, evaluation of fault, providing recommendations to resolve claims and disputes; and dispute avoidance. In addition, the consultant should be capable of evaluation and enhancement of existing Clark County Water Reclamation District claims procedures, contract documents, contractor performance documentation and construction processes for the purpose of dispute avoidance, claims mitigation, and staff training.

Minimum Qualifications

Analyst with a minimum of five years of construction scheduling analysis and claims evaluations; and have expertise in construction claims. List experience using both Primavera (P6) and Microsoft Project software. Construction claims experience of construction projects with a minimum construction value of one million dollars. Work may include attendance at design coordination meetings, construction progress meetings and field reviews. Firms and individuals may be interviewed based on the qualifications needed.
